To Whom It May Concern,

It is with great pleasure that I share how wonderful the CREA program is! This fall my third graders had the opportunity to have Sarah teach about Pond Life, one of our units in science, and to experience a field trip to the Cathance River, a vernal pool, and a small pond located in a quarry. Sarah came to my class for six weeks and brought with her "hands-on" activities. As one of my teaching partners explained to our principal, the experience with CREA was not only essential to our science curriculum ... it WAS our pond unit! In CREA's search for funding I wish to encourage you to help in any way possible. Their services to our Coffin School community are immeasurable!

Sincerely,
Ann Vellella, 3rd grade teacher
